

Accessing RemoteApp from Windows with the Microsoft Remote Desktop Store App

Windows 8 and 10 only

- 1) If not already installed, download the “Remote Desktop” app (it’s free from Microsoft) from the Windows Store and open the app.

- 2) Click “Access RemoteApp and Desktop Connections”

- 3) In the “Email or URL” field, type <https://virtual.krannert.purdue.edu/rdweb/feed/webfeed.aspx>

Click Connect

Enter your credentials. Krannert\username, and password. Check “Remember my credentials”, and click “OK”

RemoteApp and Desktop Connections

Examples:

john@contoso.com

https://contoso.com/RDWeb/Feed/webfeed.aspx

- 4) The app will download links for the applications you have access to. Simply click an app to launch it, or close it like any other program.

- 5) SAVING FILES: This can be confusing.

To save a file to the computer you are using,

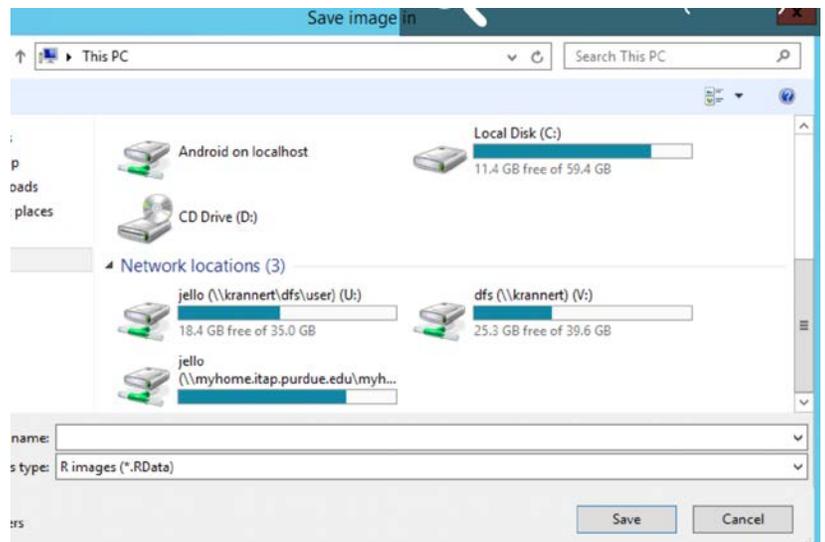

Select a location in the format:
“Android on localhost”

To save a file to your U:, V: or W: drive,

Select a location in the format:
“user (\\krannert\dfs\user) U:”

Technically, you can use “U on COMPUTERTNAME”, but this is a very slow way to save large files.

NEVER save to the “Local Disk (C:)”.
This is the server, and not your local computer.

Krannert Faculty/Staff/PhD only -

You can save to “Documents”. These files will go to a subfolder of your U: drive called “RemoteApp”.

Do not delete the “RemoteApp” folder, it contains profile information for all of your RemoteApps.

- 6) To exit, hit the “back” button twice.

IMPORTANT NOTES:

- **Idle RemoteApps will timeout after 30 minutes of inactivity. If you reconnect within 30 minutes from the time of disconnection, you can continue where you left off.**
- **If there is a temporary network disconnection between your computer and the server, again, you can reconnect within 30 minutes to continue where you left off.**
- **There is a maximum session limit of 8 hours.**
